Professional Summary

Compliance and Operations Risk professional with proven experience executing 50+ audit control tests with precision and accountability at Deutsche Telekom Digital Labs. Skilled in evaluating control design and operating effectiveness against ISO 27001, ISO 9001, and regulatory frameworks, with a track record of reducing overdue audit actions by 25%. Strong analytical thinker who systematically organizes, compares, and evaluates complex information to identify gaps and drive risk-informed decisions. Effective communicator with cross-functional stakeholders, consistently aligning testing efforts to deliver quality, timely outcomes.

Core Skills

Governance, Risk & Compliance (GRC): Control Testing, Risk Assessment, Compliance Monitoring, Audit Support

Frameworks: ISO 27001, ISO 9001, NIST, PCI DSS, GDPR, HIPAA, SOC 2 Type I & Type II, DPDP, ISO 19011

Risk & Audit: Control Validation, Gap Analysis, CAPA Management, Internal Audit, Policy Documentation

Tools: IGRCS, Splunk, JIRA

Programming: Python

Experience

GRC Intern

Jul 2025 – Dec 2025

Deutsche Telekom Digital Labs

Gurugram, India

- Executed meticulous testing of 50+ internal audit findings via the IGRCS platform, ensuring accurate and timely closure of control observations and improving audit lifecycle efficiency by 30%.
- Evaluated control design and implementation against ISO 9001:2015 QMS requirements; developed Platform Engineering BCPs and verified controls met documented policy standards across 40+ internal audits.
- Assessed control effectiveness across 100 quarterly audit reports through a structured 3-year audit calendar, including evidence collection, control validation, and gap identification.
- Applied analytical thinking to compare process documentation against ISO 9001:2015 standards, identifying gaps and driving standardization initiatives; coordinated with 15+ cross-functional stakeholders to align testing efforts and maintain transparent communication throughout the audit lifecycle.
- Managed a centralized CAPA tracker to monitor remediation progress, reducing overdue audit actions by 25% through systematic evaluation and disciplined follow-up.

Projects

GRC Controls Testing & Compliance Gap Analysis — NIST, ISO 27001, PCI DSS

Sep 2025 – Nov 2025

- Designed and executed a structured controls testing framework mapped to NIST CSF and ISO 27001, evaluating control design adequacy and operating effectiveness across 30+ simulated control objectives.
- Identified 15+ control gaps across access management, change control, and incident response; documented findings with root cause analysis and prioritized remediation recommendations by risk severity.
- Produced structured test workpapers and exception reports by systematically comparing control attributes against PCI DSS and GDPR benchmarks, validating overall compliance posture.
- Collaborated with cross-functional stakeholders (IT, Legal, Operations) to align testing scope, communicate findings, and drive timely remediation of identified control deficiencies.

Home SOC Lab — Threat Detection & Alerting — Splunk, Kali Linux, VirtualBox

Mar 2025 – Apr 2025

- Built a SOC lab (Windows victim + Kali attacker on VirtualBox); deployed Splunk & Sysmon to ingest endpoint telemetry and simulated brute-force, port scanning, and privilege escalation attacks.
- Engineered custom Splunk dashboards and detection rules to alert on each TTP; documented incident response playbooks replicating real SOC L1 triage and escalation workflows.

Education

Graphic Era University

Sep 2022 – Present

B.Tech in Computer Science (Data Science) — CGPA: 7.4

Dehradun, Uttarakhand

Certifications

- ISO 27001:2022 Lead Auditor — In Progress – Apr 2026
- ISC2 Certified in Cybersecurity (CC) — Feb 2026
- TryHackMe Pre Security — Oct 2025

Activities & Achievements

- Chairperson, IEEE GEU — oversaw chapter operations, organized 50+ technical events, workshops, and a 48-hour Tech-Sprint hackathon.
