Education

Bhagwan Parshuram Institute of Technology, Delhi

B.Tech in Computer Science

2024 –
2028

CGPA: 9.5/10

Technical Skills

Languages: C++, JavaScript, SQL, HTML, CSS

Technologies: Node.js, React, MongoDB, Supabase, AWS (EC2, S3), Docker, Nginx, Ansible

Libraries: TailwindCSS, Shadcn, NumPy, Pandas

Core: DSA, DBMS, System Design (Microservices, Load Balancing, Caching)

Projects

Herizon | MERN Stack, Socket.io, Tailwind CSS

- Built real-time crisis intervention system with <100ms latency using WebSockets
- Implemented RBAC and JWT for secure access control
- Engineered a **Zero-Friction Bridge** protocol allowing mentors to push live VC links directly to users UIs, bypassing email/SMS delays during panic attacks

Connect the Dots | React, Node.js, Express, MongoDB, MinIO, Nginx, Docker

- Built containerized full-stack system with Nginx reverse proxy-first architecture, integrating React frontend, Express APIs, MongoDB metadata storage and MinIO object storage into one reproducible deployment.
- Developed file upload, metadata CRUD, and retrieval workflows

MindBridge | MERN, Socket.io, Supabase, Tailwind

- Built real-time mental health dashboard with mood tracking
- Developed analytics dashboards and community features

Achievements

- Contributed 3+ open-source PRs
- Pre-Finalist, Industrial Ideathon 2025 (Top 30/600+ teams)
- Solved 250+ DSA problems (LeetCode, GFG) ([vaibhav050910 - LeetCode Profile](#))
- 3rd Rank, DTU Reverse Engineering Contest

- Finalist, Vibe with Singularity Hackathon
